

# Marcelo Santos

Remote (Brazil) · US/EU timezone-friendly · [marcelo@santoscodes.com](mailto:marcelo@santoscodes.com)

## Professional Summary

Fullstack engineer with solid experience building and maintaining web applications across different domains, including fintech, edtech, marketplaces, and AI-driven platforms. I've worked on backend services, frontend interfaces, and system integrations, often leading the delivery of complete features from planning to production.

Comfortable working with remote teams across time zones, always using English in async and synchronous communication. I usually work across the stack, collaborate with product and design when needed, and focus on delivering reliable solutions that match business needs.

## Technical Skills

### Languages & Frameworks

JavaScript, TypeScript, Python, Elixir, HTML, CSS

React, Svelte, NestJS, Phoenix, Django REST Framework, Ruby on Rails

### Databases

PostgreSQL, ArangoDB

### DevOps & Infrastructure

Docker, AWS (Cognito, S3, CloudWatch, EC2, SNS, SES), Vercel, CI/CD, Feature Flags

### Architecture & APIs

RESTful Services, Modular Monoliths, Integration with AI/ML layers, Domain-Driven Design
